Re: August 2007 Monthly
Report

Dear Mr. Ader:

This letter serves as the monthly progress report for August 2007, in accordance with Section X, Paragraph 29 of the RD/RA Consent Decree for the Tronox site, in Soda Springs, Idaho.

August Activities

During August, ground and surface water trends were updated and evaluated through the May 2007 sampling round. Draft copies of these assessments were provided to the Army Corp. of Engineers, along with other requested information pertinent to the site for their preparation of the five-year review report.

The calcine cap and landfill facilities were inspected in August. The gates were closed and locked. The 10-acre pond was also inspected and measured. The gates to the pond are closed and locked and the fence is in good condition. The 10-acre pond currently contains approximately 7 inches of water, measured at the south end of the pond. Enhanced evaporative efforts in the pond were concluded at the end of the month.

September/October Activities

During the months of September and October, Tronox will continue to monitor the cap, landfill and the 10-acre pond and will pump water from the landfill sump to a concrete holding pond as necessary. During September, validated ground and surface water data will be transmitted to the IDEQ and to EPA. The annual comprehensive report is scheduled for completion in October. During October, the second round of ground and surface water sampling for 2007 will be completed.

No community relation activities are planned for this period.
